# ABSTRACT OF THE PHYSICO-CHEMICAL LITERATURE IN JAPAN

## AUTHOR INDEX

VOL. XIV

1940

- Adzumi, H.** See Tominaga, H.
- Akamatsu, H.** On the measurement of a small quantity of the substance adsorbed at the solid-liquid interface. 167.  
— See Sameshima, J.
- Akiyama, K.** A study of one component system of  $\text{SiO}_2$  by means of X-rays. 164.
- Amaki, T., Iimori, T. and Sugimoto, A.** Artificial radioactivity of chromium. 158.
- Amemiya, T.** Catalytic hydro-polymerisation of acetylene. I-II. 46.
- Aoki, H.** On the scattering of fast neutrons. 159.  
— See Kikuchi, S.
- Aoki, I.** See Ishikawa, F.
- Aoyama, S. and Fukuroi, T.** Young's moduli of metals and alloys at low tin, lead, antimony and their alloys. 105.  
— and Fukuroi, T. Fine structures, in the  $K$ -absorption edges iron at low temperatures. 110.  
— and Ito, T. Thermal and electrical conductivities of metals and alloys at low temperatures. 105.
- Araki, G.** On the inversion of alkali doublets. 49.  
— and Yamamoto, Y. Energy-levels of neon. 48.
- Arii, K.** On the sorption of chlorine by active charcoal. III. The sorption isotherms at low pressure. 168.
- Asada, T., Okuda, T., Ogata, K. and Yoshimoto, S.** On the isotopic weights of carbon and nitrogen by the doublet method. 108.  
— and Makino, N. Improvement of the photo counter. 111.
- Asai, T.** Studies on the photoconductivity of semi-conducting layers composed of some heavy metal sulphide or selenide.  
I. The relation between the spectral sensitivity and the light absorption in the photoconducting layer composed of cadmium selenide, and the microscopic examinations of its structure in relation to its photoconductivity. 154.  
II. Microscopic examinations of the semi-conducting layer composed mainly of thallous sulphide in relation to its photoconductivity. 155.
- Asami, Y. and Katayama, T.** Spectroscopic study on the electric discharges in the air. 110.
- Azuma, T.** Studies on colour. I. Luminous efficiency of two element complementary colours: white luminescence from Braun tubes. 105.
- Fukuroi, T.** See Aoyama, S.
- Fuseya, G., Saito, Y. and Simazaki, K.** On the dry cells. III. Measurement of the solubilities of  $\text{ZnCl} \cdot 2\text{NH}_3$  in the electrolytes of various concentrations. 43.
- Hagisawa, H.** On the dissociation constants of selenious acid. 45.
- Hagiwara, T.** Libration of fast neutrons in the nuclear explosion of uranium irradiated by thermal neutron. 51.  
— Libration of neutrons in the nuclear explosion of uranium irradiated by thermal neutron. 53.
- Hara, M.** See Hirata, H.
- Harada, T. and Kimura, T.** Phosphorescence and afterglow of luminescent materials and other light sources. 162.
- Harasima, A.** On the thermal expansion of simple liquids. 44.  
— On the change in electrical resistance of alkali metals on melting. 106.
- Hattori, Y.** See Kinugasa, Y.
- Higasi, K. and Kubo, M.** Dimorphism of  $n$ -long chain alcohols. 104.
- Higuti, I.** Studies on the sorption of gases and vapours by titania gel. VI. Sorption and desorption equilibria of some organic vapours and the critical limit of capillary condensation phenomena. 113.
- Hirasawa, N.** See Uemura, T.
- Hirata, H., Koto, H. and Hara, M.** The effects of foreign metallic ions in electrolyte upon the inner structure of electrolytic metals. 46.

- Hirone, T.** and **Matsuda, S.** On the change of thermal conductivity of bismuth single crystal due to magnetic field. 44.
- Hirota, K.** and **Horiuti, J.** The mechanism of the hydrogen electrode process. II. The electrochemical mechanism. The existence of hydrogen molecule ions on the surface of the electrode. 52.
- Horiuti, J.** On the statistical mechanical treatment of the absolute rate of chemical reaction. 43.
- and **Okamoto, G.** The mechanism of the hydrogen electrode process. I. The catalytic mechanism. 52.
- and **Ikusima, S.** The mechanism of hydrogen electrode on the surface of Pt. 165.
- See **Hirota, K.**
- Huzita, M.** See **Tazaki, H.**
- Iijima, S.** The adsorption of ethylene on reduced nickel. 114.
- A note on the adsorption of hydrogen on reduced nickel. 170.
- Iimori, T.** See **Amaki, T.**
- Ikawa, M.** See **Sagane, R.**
- Ikusima, S.** See **Horiuti, J.**
- Inaba, A.** See **Shinohara, K.**
- Inai, T.** See **Shimizu, S.**
- Inuzuka, H.** Silicon monoxide. 156.
- Isobe, T.** See **Tominaga, H.**
- Isemura, T.** Studies on the oiliness of liquids. VII. Measurements of the static friction coefficients of esters, ketones and glycerine. 54.
- VIII. Measurements of the static friction coefficients for silver surfaces. 113.
- See **Sameshima, J.**
- Ishikawa, F.** and **Aoki, I.** On the dissociation constants of arsenious acid and hydroxylamine. 112.
- Itô, M.** See **Kawata, S.**
- Itô, T.** See **Aoyama, S.**
- Itoh, J.** See **Kikuchi**
- See **Watase, Y.**
- Iwamoto, T.** See **Okajima, S.**
- Iwasaki, T.** Studies on the catalytic oxido-reduction by some metallic complex salts. XV. Catalytic oxidation by copper complex salts. 168.
- Kambara, S.** Dipole moment of cedrene. 42.
- Kameyama, N.** and **Kin, Y.** A study of the surface of carbon brush by means of electron diffraction. 42.
- and **Mizuta, K.** Photoconductance of the dye-sensitized silver bromide and the mechanism of the dye-sensitization. II. 108.
- Kamiyama, M.** and **Sugiura, T.** Experiment on the afterglow of nitrogen. 110.
- Kaneko, S.** Dissociation constant of acetic acid. 47.
- The thermodynamic properties of non-aqueous solutions. 52.
- On the thermodynamical properties of the dilute solution of non-electrolytes. 53.
- Apparent molal volume of strong electrolytes. 53.
- Contributions to the theory of electrolytic conduction. 111.
- Theory of strong electrolytes in the case when non-Coulombic force is acting. 112.
- Thermodynamic properties of the mixed solution. 166.
- Dielectric constant of gases. 166.
- Apparent molal heat capacity of strong electrolytes. 166.
- Diffusion coefficient of strong electrolytes. 166.
- Thermodynamics of liquid dielectrics. 166.
- Katayama, T.** See **Asami, Y.**
- Kawakita, K.** On the chemisorption of carbon dioxide by reduced iron. IV. Kinetics of the chemisorption. 114.
- The kinetic of the reduction of ferric oxide. 158.
- Kawakubo, S.** Studies on the catalytic oxido-reduction of some metallic complex salts. XII. Catalytic oxidation of pyrogallol by the complex salts of platinum group. 169.
- Kawamori, H.** A study of dyestuff by the method of X-ray diffraction. II. 43.
- Kawamura, H.** See **Nishibori, E.**
- Kawata, S.** and **Ito, M.** Study of neutrons in the atmosphere with a boron coated counter. 109.
- Kikuchi, S., Watase, Y., Itoh, J., Takeda, E.** and **Yamaguchi, S.** On the disintegration of  $^{24}\text{Na}$ . 48.
- , **Aoki, H.** and **Watatuki, T.** On the angular distribution of the fast neutrons scattered by the atoms. 107.
- and **Watatuki, T.** A note on the scattering of neutrons. 158.
- See **Wakatuki, T.**
- Kimura, K.** Determination of the energy of photo-neutrons liberated from deuteron by radium C Gamma-rays. 49.
- Kimura, O.** The effect of electric fields on the viscosity of liquids. 51.
